

Z-Beam Shelving

ASSEMBLY INSTRUCTIONS

COMPONENT DESCRIPTIONS

STEP 1: Bottom Shelf

- Components: 4 Posts
2 Z-Beams
These are the steel beams that support the front and back of the shelf.
2 Z-Beams
These are the steel beams that support the sides of the shelf.
- Build the bottom shelf by inserting the Z-Beams (surface side up, see drawing top right) into the bottom two keyholes of each post using a rubber mallet.

FIG. 1

STEP 2: Top Shelf

- Components: 2 Z-Beams
These are steel beams that support the front & back of the shelf.
2 Z-Beams
These are the steel beams that support the sides of the shelf.
- Build the top shelf by inserting the Z-Beams (surface side up) into the top two keyholes of each post using a rubber mallet.

FIG. 2

STEP 3: Middle Shelves

- Components: 2 Z-Beams
These are the steel beams that support the front & back of the shelf.
2 Z-Beams
These are the steel beams that support the front & back of the shelf.
- Determine the spacing. Insert each Z-Beam into keyholes.
- Repeat steps 1-2 for each additional shelf.

FIG. 3

STEP 4: Particle Board Decking

- Place one particle board decking on each shelf.

FIG. 4

Special Notes:

- It is recommended that a rubber mallet be used to hammer the beam securely into place.
- Cardboard or carpet can be used to protect flooring.
